Application/Control Number: 09/836,045

Art Unit: 3727

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the limitation that states "when the tray is empty and is disposed in a cross stacked configuration with an upper like tray, the column recesses are adapted to receive a portion of the wall structure of the upper like tray" as stated in claim 28 in lines 18-20 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 32 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 32 states that the upper like tray is supported on the upper surface of the tray designating a positive relationship as though the combination of two trays is being claimed.

Claim 28 from which claim 32 depends only sets forth a functional relationship between the tray (the subject of the claim) and an upper like tray (not a part of the subject of the claim).

Therefore, the scope of claim 32 is not clear since it can't be determined if the upper like tray is part of a combination or not.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Application/Control Number: 09/836,045

Art Unit: 3727

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-35 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Apps et al. ('572), Apps et al. ('461), Apps et al. ('176), Apps ('352), Hammett ('487), Apps et al. ('002) and Apps et al. ('874).

Claims 1-35 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Apps et al. ('793).

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1-35 are rejected under 35 U.S.C. 103(a) as being unpatentable over Apps et al. ('793), Apps et al. ('572), Apps et al. ('461), Apps et al. ('176), Apps ('352), Hammett ('487), Apps et al. ('002) or Apps et al. ('874) in view of McGrath ('844) and Cornelius et al. ('767).

The primary references disclose the invention except for the divider wall being a double walled construction. McGrath and Cornelius et al. teach dividers of double walled construction. It would have been obvious to modify the primary references to have dividers of double walled construction in order to strengthen the divider wall and to provide a greater amount of separation between bottles in the bottle trays so that the bottles will not touch one another or become damaged due to sudden impact loads on the transporting bottle tray.
